Independent Auditor's Report
To the Shareholders of Marico Bangladesh Limited

Report on the Audit of the Financial Statements

Opinion
We have audited the financial statements of Marico Bangladesh Limited ("the Company"), which comprise the statement of financial position as at 31 March 2021, and the statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Company as at 31 March 2021, and of its financial performance and its cash flows for year then ended in accordance with International Financial Reporting Standards (IFRSs).

Basis for Opinion
We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' *Code of Ethics for Professional Accountants (IESBA Code)* and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters
Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

1. Revenue recognition

See note 5 to the financial statements

The key audit matter	How the matter was addressed in our audit
Revenue recognition has significant and wide influence on financial statements. Revenue is recognised when the amounts and the related costs are reliably measured, and the performance obligation is complete through passing of control to the customers. Revenue from the sale of goods is recognised at the time when the goods are delivered to the customer. The Company makes most of the sales after receiving advance payment. The sales of the Company are derived from a large number of distributors located over the country with relatively small amount of transactions. Revenue is measured at net of discounts and incentives earned by customers. We identified revenue recognition as a key audit matter because revenue is one of the key performance indicators of the Company and therefore there is an inherent risk of manipulation of the timing of recognition of revenue by management to meet specific targets or expectations.	Our audit procedures in this area included, among others: • We understood, evaluated and validated the key controls related to the Company's sales process from end to end, from contracts approval and sign-off, recording of sales, all the way through to cash receipts and customers' outstanding balances. • We have tested the sales cut-off at the close to the period-end to ensure the completeness of revenue recognised in financial statements by reviewing relevant supporting documents regarding the appropriateness of recording sales made in the current and subsequent accounting period • We conducted substantive testing of revenue recorded over the period using sampling techniques, by examining the relevant supporting documents including customer acknowledged sales invoices, VAT Challans and outbound delivery note. We also confirmed customer balances at the statement of financial position date.

Rahman Rahman Huq, a partnership firm registered in Bangladesh and a member firm of the KPMG global organisation of independent member firms affiliated with KPMG International Limited, a private English company limited by guarantee.

Independent Auditor's Report (continued)

1. Revenue recognition (continued)

See note 5 to the financial statements

The key audit matter	How the matter was addressed in our audit
Confirmation documents of dispatching goods were provided by listed transporting agencies based on different locations. There is a risk of differences between the timing of invoicing of products and delivery of the products to the company's customers. Accordingly, there could be potential misstatements that these revenue transactions are not recognised in the correct reporting period. Due to the complexities and the inherent risk of manipulation in revenue recognition, we determined this to be a key audit matter. The company has reported total revenue of BDT 11,307 million (31 March 2020: BDT 9,796 million) in current year.	• We have assessed the completeness of trade spends by obtaining relevant supporting documentation or calculation for discounts and rebates settled during the year. • We confirmed certain customers' receivable balances at the balance sheet date, selected on a sample basis by considering the amounts outstanding with those customers.

2. Existence of inventory

See note 19 to the financial statements

The key audit matter	How the matter was addressed in our audit
The Company had inventory of BDT 1,980 million (31 March 2020: BDT 1,632 million) as at 31 March 2021, held at plants, warehouses, depots and third-party locations and across multiple product lines. Inventories are kept and distributed from different location of the Country which increase the susceptibility of lost and misappropriation of inventories. Hence existence of inventories had been considered as key audit matter.	Our audit procedures were designed to confirm the existence of inventories and to challenge the adequacy of the Company's provisions against inventory included: • Evaluating the design and implementation of key inventory controls operating across the Company, including those at a sample of distribution centres, warehouses and depots; • Attending inventory counts and obtaining stock confirmations from third-parties to check the existence and reconciling the count results to the inventory listings to test the completeness of data;

Independent Auditor's Report (continued)

Other Information
Management is responsible for the other information. The other information comprises the information included in the Annual Report but does not include the financial statements and our auditor's report thereon. The Annual Report is expected to be made available to us after the date of this auditor's report.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

When we read the Annual Report, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance.

Responsibilities of Management and Those Charged with Governance for the Financial Statements
Management is responsible for the preparation of financial statements that give a true and fair view in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements
Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards;

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

In accordance with the Companies Act 1994 and the Securities and Exchange Rules 1987, we also report the following:

a) we have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit and made due verification thereof;

b) in our opinion, proper books of account as required by law have been kept by the Company so far as it appeared from our examination of these books;

c) the statement of financial position and the statement of profit or loss and other comprehensive income dealt with by the report are in agreement with the books of account and returns; and

d) the expenditure incurred was for the purposes of the Company's business.

The engagement partner on the audit resulting in this independent auditor's report is M Mehedi Hasan.

RAHMAN RAHMAN HUQ KPMG DHAKA

1. Reporting entity

1.1 Company profile

Marico Bangladesh Limited (hereinafter referred to as 'MBL' or 'the Company' is a public limited company incorporated on 6 September 1999, vide the certificate of incorporation number C-38527(485)/99 of 1999 in Bangladesh under the Companies Act, 1994 and has its registered address at House # 01, Road # 01, Sector # 01, Uttara Model Town, Dhaka-1230. The corporate address of the Company is at The Glass House, Level 6-7, Plot 2, Block SE(B), Gulshan 1, Dhaka 1212. The Company was initially registered as a private limited company and subsequently converted into a public limited company on 21 September 2008. The Company has been listed with both Dhaka Stock Exchange (DSE) and Chittagong Stock Exchange (CSE) on 16 September 2009.

1.2 Nature of business

The Company is engaged in manufacturing and marketing of consumer products under the brand name of Parachute, Nihar, Saffola, Hair Code, Livon, Parachute Advanced, Beliphool, Ayurvedic Gold, Extra Care, Parachute Body Lotion, Set-Wet, Bio Oil and Studio-X in Bangladesh. The Company started its commercial operation on 30 January 2000. Subsequently, it started its commercial production at Filling unit, Crushing unit and Refinery unit in 2002, 2012 & 2017 respectively. Its manufacturing plants are located at Mouchak, Kaliakoir, Gazipur and Shirirchala, Mahona, Bhabanipur, Gazipur. The Company sells its products through its own distribution channels comprising of sales depots located in Gazipur, Chittagong, Bogra and Jessore.

2. Basis of preparation

2.1 Statement of compliance

The Financial Reporting Act, 2015 (FRA) was enacted in 2015. The Financial Reporting Council (FRC) under the FRA has been formed in 2017 but the Financial Reporting Standards (FRS) under this council is yet to be issued for public interest entities such as listed entities.

As the FRS is yet to be issued by FRC hence as per the provisions of the FRA (section-69), the financial statements have been prepared in accordance with International Financial Reporting Standards (IFRSs) and the Companies Act, 1994. The title and format of these financial statements follow the requirements of IFRSs which are to some extent different from the requirement of the Companies Act, 1994. However, such differences are not material and in the view of management, IFRS format gives a better presentation to the shareholders.

The Company also complied with the requirements of following laws and regulations from various Government bodies:

i. Bangladesh Securities and Exchange Rules, 1987;
ii. The Income Tax Ordinance, 1984; and
iii. The Value Added Tax and Supplementary Duty Act, 2012.

Details of the Company's accounting policies including changes during the year, if any, are included in Note 43.

2.2 Authorisation for issue

These financial statements are authorised for issue by the Board of Directors in its 114th Board of Directors meeting held on 27 APR 2021

2.3 Reporting period

The financial period of the Company covers 1 year from 1 April to 31 March and is followed consistently.

RAHMAN RAHMAN HUQ KPMG DHAKA

2. Basis of preparation (continued)

2.4 Comparative and reclassification

Comparative information has been disclosed for all numerical, narrative and descriptive information where it is relevant for understanding of the current year financial statements. Comparative figures have been rearranged/reclassified wherever considered necessary, to ensure better comparability with the current year financial statements and to comply with relevant IFRSs.

3. Functional and presentation currency

These financial statements are presented in Bangladeshi Taka (Taka/TK/BDT) which is the Company's functional currency. All amounts have been rounded to the nearest Taka, unless otherwise indicated.

4. Use of judgements and estimates

In preparing these financial statements, management has made judgements, estimates and assumptions that affect the application of company's accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to estimates are recognised prospectively.

(a) Judgements

Information about judgements made in applying accounting policies that have the most significant effects on the amounts recognised in the financial statements is included in the following notes:

Note 16	Right-of-use assets
Note 23	Lease liabilities

(b) Assumptions and estimation uncertainties

Information about assumptions and estimation uncertainties at 31 March 2021 that have a significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities in the next financial year is included in the following notes:

Note 13 (B)	Deferred tax assets
Note 14	Property, plant and equipment
Note 15	Intangible assets
Note 19 & Note 43.5	Inventories
Note 22	Employee benefits
Note 26	Current tax liabilities
Note 31	Contingent liabilities

11. Contribution to WPPF

In Taka	For the year ended 31 March 2021	31 March 2020
Profit before contribution to WPPF	**4,415,177,405**	3,760,088,146
Applicable contribution rate	**5%**	5%
	220,758,870	188,004,407

The Company operates a fund for workers as workers' profit participation and welfare fund and provides 5% of its profit before workers' profit participation fund (WPPF) and tax as per provision of the Bangladesh Labour Act 2006. Please see note 43.9(iv)

12. Earnings per share

12.1 Basic earnings per share

In Taka	For the year ended 31 March 2021	31 March 2020
Profit attributable to ordinary shareholders (net profit after tax)	**3,108,680,032**	2,646,238,447
Weighted average number of ordinary shares outstanding during the year	**31,500,000**	31,500,000
Earnings per share (EPS) in Taka	**98.69**	84.01

12.2 Diluted earnings per share

As per IAS-33 "Earnings Per Share", the calculation of diluted earning per share does not assume conversion, exercise or other issue of potential ordinary shares that would have an anti dilutive effect on earning per share. The Company has no dilutive instruments that is why the diluted earning per share and basic earning per share is same.

RAHMAN RAHMAN HUQ KPMG DHAKA

13. Income tax expense

Gratuity scheme is funded from current year. As a result, MBL has made contribution in planned asset. There was no planned asset in previous year.

RAHMAN RAHMAN HUQ KPMG ★ DHAKA ★

22.5 Defined Benefit obligation

(i) Actuarial assumption

The followings were the principal actuarial assumptions at the reporting date :

	31 March 2021	31 March 2020
Discount rate	**7.5%**	10%
Salary increase rate	**12%**	12%
Employee turnover rate	**11%**	11%

Assumptions regarding future mortality have been used based on published statistics and mortality tables. As there is no published mortality table in Bangladesh and hence the Indian Assured Lives Mortality rate (2006-08) ultimate based on the mortality experience of assured lives in India is being used as a reasonable approximation. This table is based on the experience of assured lives in India during the years 2006 to 2008.

	24,608,795	16,124,364
Current	**1,534,615**	1,492,473
Non-Current	**23,074,180**	14,631,891
	24,608,795	16,124,364

23. Lease liabilities

See accounting policy in Note 43.15.

The Company leases many assets, including properties, warehouses, depots and sales offices. Total number of lease assets is twenty two and average terms of period of lease is four to eleven years. The incremental borrowing rate (IBR) is 11.2%. The factory leases were entered into many years ago as combined leases of land and buildings.

The following table sets out a maturity analysis of lease payables, showing the undiscounted lease payments to be paid after the reporting date.

In Taka	31 March 2021	31 March 2020

		2,296,350,000	2,551,500,000

33. Capital management

For the purpose of the Company's capital management, capital includes issued capital, share premium and all other equity reserves attributable to the equity holders of the Company. The primary objective of the Company's capital management is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business.

To maintain or adjust capital structure, the Company may adjust the amount of dividend, return on capital, issue new share or obtain long term-debt. All major investment and financing decisions, as a part of its capital management, are evaluated and approved by its Board of Directors.

No changes were made in the objectives, policies or processes for managing capital during the year ended 31 March 2021.

34. Segment information

The Company essentially provides similar products to customers across the country. Business activities in which it engages and the economic environments in which it operates are of similar nature. Its business is not segmented by products or geographical areas and its operating result is viewed as a whole by its management. Hence, segment information is not relevant for the Company.

RAHMAN RAHMAN HUQ KPMG DHAKA

35. Number of employees

The number of employees engaged for the whole year or part there of who received a total salary of TK 36,000 p.a. and above is 417 (2020:336), among them 106 employees left Marico and 311 (2020:272) existed at 31 March 2021.

36. Impact of COVID-19 on Marico Bangladesh Limited

On 11 March 2020, COVID-19 has been declared a pandemic by the World Health Organisation, and Bangladesh Government has taken restrictive measures including declared general public holidays to contain its further spread affecting free movement of people and goods. As a consequence, the COVID-19 outbreak has brought about additional challenges in the Company's operating environment and has impacted the way of Company's opefations in Bangladesh.

The Company is closely monitoring the impact of the developments on the Company's businesses. As the situation is fast evolving, the effect of the outbreak is subject to significant levels of uncertainty, with the full range of possible effects unknown.

The Company had assessed the impact of COVID-19 on its business. The assessment was made in the following areas:

IFRS 9 - Financial Instruments
IFRS 13 - Fair Value Measurement
IFRS 15 - Revenue from Contracts with Customers
IFRS 16 - Leases
IAS 2 - Inventories
IAS 12 - Income Taxes
IAS 19 - Employee Benefits
IAS 20 - Accounting for Government Grants and Disclosure of Government Assistance
IAS 36 - Impairment of Assets:
IAS 37 - Provisions, Contingent Liabilities and Contingent Assets

From the assessment, the Company determines that it will not face any hurdle to manage working capital balances to generate sufficient operating cash flows to meet the obligations as fall due. So, the Company does not have any plan to defer any capital expenditures, dividends and other distributions. In addition to this, the Company does not have any plan or is not in a situation that require to seek financial support from shareholders or taking advantage of government assistance. Overall, there is no mentionable impact of COVID-19 on the financial statements of Marico Bangladesh Limited for the year ended 31 March 2021.

37. Subsequent events

As per *IAS - 10 "Events after the Reporting Period"* events after the reporting period are those events, favourable and unfavourable, that occur between the end of the reporting period and the date when the financial statements are authorized for issue. Two types of event can be identified:

(a) Adjusting events after the reporting period which provide evidence of conditions which existed at the end of the reporting period; and

(b) Non adjusting events after the reporting period, are those that are indicative of conditions that arose after the reporting period.

The details about the events after reporting period are as follows:

The Board of Directors of Marico Bangladesh Limited at its 114th meeting held on 27 APR 2021 has recommended final cash dividend @ 200% i.e. Taka 20 per share, amount to total Taka 630,000,000 for the year ended at 31 March 2021.

38. Financial instruments - fair values and financial risk management (continued)
38.2 Financial risk management

The Company management has overall responsibility for the establishment and oversight of the Company's risk management framework. Risk management policies, procedures and systems are reviewed regularly to reflect changes in market conditions and the Company's activities. The Company has exposure to the following risks from its use of financial instruments:

- Credit risk
- Liquidity risk
- Market risk

38.2.1 Credit risk

Credit risk is the risk of financial loss if a customer or counterpart to a financial instrument fails to meet its contractual obligation which arises principally from the Company's receivables from customers.

The Company makes sales on advance basis i.e. it receives advance from customers prior to sale, so there is no credit risk due to collectability from the customers. However, the Company maintains most of the financial assets with short-term deposits and cash and cash equivalents.

The carrying amount of financial assets represents the maximum credit exposure. The maximum exposure to credit risk at the reporting date was:

38. Financial instruments - fair values and financial risk management (continued)
38.2 Financial risk management (continued)
38.2.2 Liquidity risk

Liquidity risk is the risk that the Company may encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or other financial assets.

The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

The contractual maturities of financial liabilities of the Company are as follows:

			Contractual cash flows					
In Taka	**Note**	Carrying amount	Expected cash flow	2 months or less	2-12 months	1- 2 years	2- 5 years	More than 5 years
31 March 2021								
Loans and borrowings	24	250,000,000	250,000,000	250,000,000	-	-	-	-
Trade and other payables	25	3,082,900,365	3,082,900,365	513,816,727	2,569,083,638	-	-	-
Lease liabilities	23	166,890,934	166,890,934	7,232,159	37,402,052	48,886,907	67,986,282	5,383,534
		3,499,791,299	3,499,791,299	771,048,886	2,606,485,690	48,886,907	67,986,282	5,383,534
31 March 2020								
Trade and other payables	25	2,711,929,259	2,711,929,259	2,711,929,259	-	-	-	-
Lease liabilities	23	210,564,733	210,564,733	21,030,699	21,805,694	50,131,396	117,596,944	-
		2,922,493,992	2,922,493,992	2,732,959,958	21,805,694	50,131,396	117,596,944	-

RAHMAN RAHMAN HUQ KPMG DHAKA

38. Financial instruments - fair values and financial risk management (continued)

38.2 Financial risk management (continued)

38.2.3 Market risk

Market risk is the risk that includes changes in market price, such as foreign exchange rate, interest rates, and equity prices that may affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

i) **Currency risk**

The Company's exposures to foreign currency risk at 31 March 2021 are as follows:

In USD	31 March 2021	31 March 2020
Import of goods and services	**(771,798)**	(564,730)
Bank balance	**508,702**	330,351
	(263,096)	(234,379)

The following significant exchange rates have been applied during the period/year:

	Average rate		Year-end spot rate	
	31 March 2021	31 March 2020	31 March 2021	31 March 2020
Exchange rate (USD/BDT)	**84.82**	84.62	**84.71**	84.94

ii) **Foreign exchange rate sensitivity analysis**

The basis for the sensitivity analysis to measure foreign exchange risk is an aggregate corporate-level currency exposure. The aggregate foreign exchange exposure is composed of all assets and liabilities denominated in foreign currencies.

A 1% change in foreign exchange rates would have increased/(decreased) equity and profits or loss by the amounts shown below. This analysis assumes that all other variables, in particular interest rates remain constant.

	Profit/(loss)		Equity	
Effect in Taka	**Strengthening**	**Weakening**	**Strengthening**	**Weakening**
31 March 2021				
USD (1% movement)	**(222,869)**	**222,869**	**(222,869)**	**222,869**
31 March 2020				
USD (1% movement)	(199,082)	199,082	(199,082)	199,082

38.2 Financial risk management (continued)
38.2.3 Market risk (continued)

iii) Interest rate risk

Interest rate risk is the risk that arises due to changes in interest rates. The Company is not exposed to fluctuations in interest rates as it has no floating interest rate bearing financial liability as at the reporting date. The Company has not entered into any agreement involving derivative instrument at the reporting date.

As at 31 March 2021, the interest rate profile of the Company's interest bearing financial instruments was:

In Taka	**31 March 2021**	**31 March 2020**
Fixed rate instruments		
Financial assets		
Fixed deposit receipts	**1,737,974,722**	1,290,000,000

39. Value of import calculated on CIF basis

In Taka	31 March 2021	31 March 2020
Materials and finished goods	**3,069,741,302**	2,743,115,157
Capital goods	**2,226,274**	143,058,091
	3,071,967,576	2,886,173,248

40. Expenditure in foreign currency

In Taka	31 March 2021	31 March 2020
General and technical assistance fees	**86,547,962**	72,443,188
Professional consultation fees	**2,739,756**	7,030,998
	89,287,718	79,474,186

41. Basis of measurement

The financial statements of the Company have been prepared on historical cost basis except for net defined benefit (asset)/liability for which the measurement basis is the fair value of plan assets less the present value of the defined benefit obligation, as explained in Note 43.9.

42. Standards issued but not yet effective

A number of new standards are effective for annual periods beginning after 1 January 2020 and earlier application is permitted; however, the Company has not early adopted the new or amended standards in preparing these financial statements.

A. Onerous contracts – Cost of Fulfilling a Contract (Amendments to IAS 37)

The amendments specify which costs an entity includes in determining the cost of fulfilling a contract for the purpose of assessing whether the contract is onerous. The amendments apply for annual reporting periods beginning on or after 1 January 2022 to contracts existing at the date when the amendments are first applied. At the date of initial application, the cumulative effect of applying the amendments is recognised as an opening balance adjustment to retained earnings or other components of equity, as appropriate. The comparatives are not restated. The Company has determined that all contracts existing at 31 March 2021 will be completed before the amendments become effective.

B. Interest Rate Benchmark Reform – Phase 2 (Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16)

The amendments address issues that might affect financial reporting as a result of the reform of an interest rate benchmark, including the effects of changes to contractual cash flows or hedging relationships arising from the replacement of an interest rate benchmark with an alternative benchmark rate. The amendments provide practical relief from certain requirements in IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16 relating to:

- Changes in the basis for determining contractual cash flows of financial assets, financial liabilities and lease liabilities; and

- Hedge accounting.

C. Other standards

The following new and amended standards are not expected to have a significant impact on the Company's financial statements.

- *COVID-19-Related Rent Concessions (Amendment to IFRS 16).*
- *Property, Plant and Equipment: Proceeds before Intended Use (Amendments to IAS 16).*
- *Reference to Conceptual Framework (Amendments to IFRS 3).*
- *Classification of Liabilities as Current or Non-current (Amendments to IAS 1).*
- *IFRS 17 Insurance Contracts and amendments to IFRS 17 Insurance Contracts.*

RAHMAN RAHMAN HUQ KPMG DHAKA

43. Significant accounting policies

The Company has consistently (otherwise as stated) applied the following accounting policies to all periods presented in these financial statements.

43.1 Foreign currency transactions

Transactions in foreign currencies are translated to the functional currency (BDT) at exchange rates at the dates of transactions. Monetary assets and liabilities denominated in foreign currencies at reporting date are re-translated into (BDT) at the exchange rates ruling at the statement of financial position date. Non-monetary assets and liabilities denominated in foreign currencies, stated at historical cost, are translated into (BDT) at the exchange rate ruling at the date of transaction. Foreign exchange differences arising on translation are recognised in profit or loss.

43.2 Property, plant and equipment

i) Recognition and measurement

Property, plant and equipment (PPE) is recognised as an asset if it is probable that future economic benefits associated with the asset will flow to the entity and the cost of the item can be measured reliably.

Items of property, plant and equipment are measured at cost less accumulated depreciation and accumulated impairment losses. Cost includes expenditure that is directly attributable to the acquisition of the assets, bringing the assets to the location and condition necessary for it to be capable of operating in the manner intended by management.

Parts of an item of property, plant and equipment having different useful lives, are accounted for as separate items (major components) of property, plant and equipment.

ii) Subsequent cost

Subsequent cost of an item of property, plant and equipment is capitalised only if it is probable that future economic benefits embodied within the item will flow to the Company and its costs can be measured reliably. The costs of the day-to-day servicing of property, plant and equipment are recognised in profit or loss as incurred.

RAHMAN RAHMAN HUQ KPMG DHAKA

43. Significant accounting policies (continued)
43.2 Property, plant and equipment (continued)

iii) Depreciation

No depreciation is charged on land and asset under construction (AuC) as the land has unlimited useful life and AuC has not yet been placed in service/commissioned.

Other items of property, plant and equipment is depreciated on a straight line basis in profit or loss over the estimated useful lives of each item of property, plant and equipment. Depreciation is based on the cost of an asset less its residual value. Significant components of individual assets are assessed and if a component has a useful life that is different from the remainder of that asset, that component is depreciated separately. Depreciation is charged from the month of acquisition of property, plant and equipment and no depreciation is charged in the month of disposal.

Depreciation methods, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate. The estimated useful lives of the items of property, plant and equipment for the current and comparative period are as follows:

Assets	**Depreciation rate**
Plant and machinery	10-33%
Factory equipment	20-33%
Moulds	15-33%
Factory building	5-20%
Laboratory equipment	20-33%
Office equipment	33-50%
Computers	33-50%
Furniture and fixtures	20-50%
Office building	10-20%
A.C and refrigerators	20-33%

iv) Derecognition

An asset is derecognised on disposal or when no future economic benefits are expected from its use and disposal. Gains or losses arising from the derecognition of an asset are determined as the difference between net disposal proceeds and the carrying amount of the assets and are recognised in profit or loss.

v) Asset under construction

Asset under construction represents the cost incurred for acquisition and/or construction of items of property, plant and equipment that are not ready for use which is measured at cost. These are transferred to the property, plant and equipment on the completion of the projects.

vi) Capitalisation of borrowing costs

As per the requirements of IAS 23 *Borrowing Costs*, directly attributable borrowing costs are capitalised during construction period for all qualifying assets. A qualifying asset is an asset that necessarily takes a substantial period of time to get ready for its intended use or sale. The borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are those borrowing costs that would have been avoided if the expenditure on the qualifying asset had not been made. All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

RAHMAN RAHMAN HUQ KPMG DHAKA

43. Significant accounting policies (continued)

43.3 Intangible assets

i) Recognition and measurement

Intangible assets have finite useful lives and are stated at cost less accumulated amortisation and any impairment losses. Intangible assets are recognised in accordance with IAS 38 *Intangible assets*. Intangible assets include cost of acquisition of computer software, intellectual property, copyright and other costs incidental to such capital expenditure.

ii) Subsequent costs

Subsequent costs are capitalised only when they increase the future economic benefits embodied in the specific asset to which they relate. All other costs are recognised in profit or loss as incurred.

iii) Amortisation

Amortisation is recognised in profit or loss on straight line basis over the estimated useful lives of intangible assets from the date they are available for use.

Intangible asset (Computer Software) is amortised at the rate of 20% to 33%.

iv) Derecognition

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of intangible assets, measured as the difference between the net disposal proceeds and the carrying amount of the assets, are recognised in profit or loss.

43.4 Right-of-use asset

The Company recognises a right-of-use asset at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount,of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use assets is subsequently depreciated using the straight-line method from the commencement date to the end of the lease term, unless the lease transfers ownership of the underlying asset to the Company by the end of the lease term.

43.5 Inventories

Inventories are measured at the lower of cost and net realisable value. The cost of inventories is based on weighted average cost method, and includes expenditure incurred in acquiring the inventories, production or conversion costs, and other costs incurred in bringing them to their existing location and condition. In the case of manufactured inventories and work in progress, cost includes an appropriate share of production overheads based on normal operating capacity. Stores and spares and material in transit are measured at cost.

Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

Raw material, packing material and semi-finished goods are categorised in moving, slow moving and non-moving inventory and inventory provision is calculated based on 25% of slow moving inventories and 100% of non-moving inventories. Finished goods are categorised in fresh, slow moving, non-moving and expired inventories based on shelf life of the product. Inventory provision is calculated based on 25% of slow moving and 100% of non-moving and expired finished goods. Management may decide to make additional provision for seasonal and newly developed product. For spare parts, inventory provision is calculated based on 10% of the total value of spares parts.

RAHMAN RAHMAN HUQ KPMG DHAKA

43. Significant accounting policies (continued)

43.6 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

i. Recognition and initial measurement

Trade receivables and debt securities issued are initially recognised when they are originated. All other financial assets and financial liabilities are initially recognised when the Company becomes a party to the contractual provisions of the instrument.

A financial asset (unless it is a trade receivable without a significant financing component) or financial liability is initially measured at fair value plus, for an item not at FVTPL, transaction costs that are directly attributable to its acquisition or issue. A trade receivable without a significant financing component is initially measured at the transaction price.

ii. Classification and subsequent measurement

Financial assets

On initial recognition, a financial asset is classified as measured at: amortised cost; FVOCI – debt investment; FVOCI – equity investment; or FVTPL.

Financial assets are not reclassified subsequent to their initial recognition unless the Company changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A debt investment is measured at FVOCI if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

On initial recognition of an equity investment that is not held for trading, the Company may irrevocably elect to present subsequent changes in the investment's fair value in OCI. This election is made on an investment-by-investment basis.

All financial assets not classified as measured at amortised cost or FVOCI as described above are measured at FVTPL. This includes all derivative financial assets. On initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

RAHMAN RAHMAN HUQ KPMG DHAKA

43. Significant accounting policies (continued)

43.6 Financial instruments (continued)

Financial assets – business model assessment

The Company makes an assessment of the objective of the business model in which a financial asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

- the stated policies and objectives for the portfolio and the operation of those policies in practice. These include whether management's strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realising cash flows through the sale of the assets;
- how the performance of the portfolio is evaluated and reported to the Company's management; the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- how managers of the business are compensated – e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- the frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

Financial assets – subsequent measurement and gains and losses

Financial assets at FVTPL	These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognised in profit or loss.
Financial assets at amortised cost	These assets are subsequently measured at amortised cost using the effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognised in profit or loss. Any gain or loss on derecognition is recognised in profit or loss.
Debt investments at FVOCI	These assets are subsequently measured at fair value. Interest income calculated using the effective interest method, foreign exchange gains and losses and impairment are recognised in profit or loss. Other net gains and losses are recognised in OCI. On derecognition, gains and losses accumulated in OCI are reclassified to profit or loss.
Equity investments at FVOCI	These assets are subsequently measured at fair value. Dividends are recognised as income in profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognised in OCI and are never reclassified to profit or loss.

Financial assets includes cash and cash equivalents, trade and other receivables and short term investment.

(a) Cash and cash equivalents

Cash and cash equivalents comprise cash balances and all cash deposits with maturities of three months or less that are subject to an insignificant risk of changes in their fair value, and are used by the Company in the management of its short-term commitments.

(b) Trade and other receivables

Trade and other receivables are recognised initially at fair value. Subsequent to initial recognition they are measured at amortised cost using the effective interest method, less any impairment losses.

RAHMAN RAHMAN HUQ KPMG DHAKA

43. Significant accounting policies (continued)

43.6 Financial instruments (continued)

(c) Short-term investment

Short-term investment consists of fixed deposits with original maturity of more than three months. The Company has the positive intent and ability to hold FDR to maturity, and such financial assets are carried as financial assets at amortised cost. Held-to-maturity financial assets are recognised initially at fair value plus any directly attributable transaction costs. Subsequent to initial recognition, held-to-maturity financial assets are measured at amortised cost using the effective interest method, less any impairment losses.

iii. Financial liability

All financial liabilities are recognised initially on the transaction date at which the Company becomes a party to the contractual provisions of the liability.

The Company derecognises a financial liability when its contractual obligations are discharged or cancelled or expired.

Financial liabilities include trade and other payables etc.

(a) Trade and other payables

The Company recognises trade and intercompany payables when its contractual obligations arising from past events are certain and the settlement of which is expected to result in an outflow from the entity of resources embodying economic benefits.

(b) Loans and borrowings

The Company derecognises loans and borrowings when its contractual obligations are discharged or cancelled, or expire. The Company also derecognises loans and borrowings when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognised at fair value.

43.7 Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of ordinary shares, net of any tax effects, are recognised as a deduction from equity.

Paid up capital represents total amount contributed by the shareholders and bonus shares, if any, issued by the Company to the ordinary shareholders. Holders of ordinary shares are entitled to receive dividends as declared from time to time and are entitled to vote at shareholders' meetings. In the event of a winding up of the Company, ordinary shareholders rank after all other shareholders and creditors and are fully entitled to any residual proceeds of liquidation.

43.8 Dividend to the equity holders

The Company recognises a liability to make cash dividend when the distribution is authorised and the distribution is no longer at the discretion of the Company. As per the corporate laws in Bangladesh, a distribution is authorised when it is approved by the shareholders. A corresponding amount is recognised directly in equity.

43.9 Employee benefits

i) Short-term employee benefits

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided. A liability is recognised for the amount expected to be paid under short-term cash bonus if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee, and the obligation can be estimated reliably.

RAHMAN RAHMAN HUQ KPMG DHAKA

43. Significant accounting policies (continued)

43.9 Employee benefits

ii) Defined benefit plan (Gratuity)

The Company operates an funded gratuity scheme, provision in respect of which is made annually covering all its eligible employees. This scheme is qualified as defined benefit plan. Employees are entitled to Gratuity benefit after completion of minimum 05 (five) years of continuous service with the Company from the date of his/her joining.

Eligibility to gratuity payments

Actual years of service	Eligibility	Calculation
Less than 4.5 years	Not eligible	Nil
4.5 years or more but less than 9.5 years	Eligible	(Last basic drawn)* (No. of years service)
9.5 years or more	Eligible	(Last basic drawn)* (No. of years service)* (1.5)

The calculation is performed annually by a qualified actuary using the projected unit credit method. When the calculation results in a benefit to the Company, the recognised asset is limited to the total of any unrecognised past service costs and the present value of economic benefits available in the form of any future refunds from the plan or reductions in future contributions to the plan. When the benefits of the plan are improved, the portion of the increased benefit related to past service by employees is recognised in profit and loss on a straight line basis over the average period until the benefits become vested. To the extent that the benefits vest immediately, the expense is recognised immediately in profit and loss. Remeasurements of the net defined benefit liability, which comprise actuarial gains and losses, are recognised immediately in other comprehensive income. Relevant tax impacts of such remeasurements are also recognised under other comprehensive income.

iii) Leave encashment

The Company operates an unfunded leave encashment scheme, i.e. if its employees do not avail leave during his/her service, s/he will be entitled to encash privilege leave at the time of separation from the Company subject to maximum 60 days, at the rate of one month's basic pay for 30 days of privilege leave. This scheme is qualified as other long term employee benefits.

The Company's net obligation in respect of leave encashment scheme is the amount of future benefit that employees have earned in return for their service in the current and prior years and the calculation is performed annually by a qualified actuary.

iv) Workers' profit participation and welfare fund

The Company operates a fund for workers as workers' profit participation and welfare fund ("the Fund") and provides 5% of its profit before WPPF and tax as per provision of the Bangladesh Labour Act 2006. The Company recognises the contribution to the fund as short term employee benefits.

The Fund is governed by Bangladesh Labour Act, 2006 as amended up to 28 September 2015 and the Trust Deed.

43.10 Accruals

Accruals are liabilities to pay for goods or services that have been received or supplied but have not been paid, invoiced or formally agreed with the supplier, including amongst due to employees. Accruals are reported as part of trade and other payables.

43.11 Provisions

A provision is recognised in the statement of financial position when the Company has a legal or constructive obligation as a result of past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate thereof can be made.

Provisions are reviewed at the end of each reporting period and adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources embodying economic benefits are required to settle the obligation, the provisions are reversed.

RAHMAN RAHMAN HUQ KPMG DHAKA

43. Significant accounting policies (continued)

43.12 Income tax expenses

Income tax expense comprises current and deferred tax. Current tax and deferred tax are recognised in profit or loss except to the extent that it relates to a business combination, or items recognised directly in equity or in other comprehensive income.

i) Current tax

Current tax is the expected tax payable or receivable on the taxable income or loss for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years. Provision for corporate income tax is made following the rate applicable for companies as per Finance Act 2020 i.e. 25%.

ii) Deferred tax

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, using tax rates enacted or substantively enacted by the reporting date.

Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realised simultaneously.

A deferred tax asset is recognised for unused tax losses, tax credits and deductible temporary differences, to the extent that it is probable that future taxable profits will be available against which they can be utilised. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

43.13 Revenue

The Company has initially applied IFRS 15 *Revenue from contracts with customers* from 1 April 2018. The Company recognises as revenue the amount that reflects the consideration to which the Company expects to be entitled in exchange for goods or services when (or as) it transfers control to the customer. To achieve that core principle, IFRS 15 establishes a five-step model as follows:

• Identify the contract with a customer;
• Identify the performance obligations in the contract;
• Determine the transaction price;
• Allocate the transaction price to the performance obligations in the contract; and
• Recognise revenue when (or as) the entity satisfies a performance obligation.

Considering the five steps model, the Company recognises revenue when (or as) the Company satisfies a performance obligation by transferring a promised good to a customer. Goods are considered as transferred when (or as) the customer obtains control of that goods. Revenue from sale of goods is measured at the fair value of the consideration received or receivable net of returns and allowances, trade discounts, rebates and Value Added Tax (VAT).

43.14 Finance income and finance cost

i) Finance income

Finance income comprises interest income on funds invested and is recognised as it accrues in profit or loss using the effective interest method.

ii) Finance cost

Finance cost comprise interest expense on borrowings and foreign exchange gain or loss.

Borrowing costs that are not directly attributable to the acquisition, construction or production of a qualifying asset are recognised in profit or loss using the effective interest method.

RAHMAN RAHMAN HUQ KPMG DHAKA

43. Significant accounting policies (continued)
43.15 Lease liabilities

The Company recognises a right-of-use asset and a lease liabilities at the lease commencement date. The right-of-use asset is initially measured at cost, and subsequently at cost less any accumulated depreciation and impairment losses, and adjusted for certain remeasurements of the lease liabilities.

The lease liabilities is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Company's incremental borrowing rate. Generally, the Company uses its incremental borrowing rate as the discount rate.

The lease liabilities is subsequently increased by the interest cost on the lease liabilities and decreased by lease payment made. It is remeasured when there is a change in future lease payments arising from a change in an index or rate, a change in the estimate of the amount expected to be payable under a residual value guarantee, or as appropriate, changes in the assessment of whether a purchase or extension option is reasonably certain to be exercised or a termination option is reasonably certain not to be exercised.

The Company has applied judgement to determine the lease term for some lease contracts in which it is a lessee that include renewal options. The assessment of whether the Company is reasonably certain to exercise such options impacts the lease term, which significantly affects the amount of lease liabilities and right-of-use assets recognised.

43.16 Impairment

i. Financial assets

The Company recognises loss allowances for ECLs on:

- financial assets measured at amortised cost;
- debt investments measured at FVOCI; and
- contract assets.

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

The Company measures loss allowances at an amount equal to lifetime ECLs, except for the following, which are measured at 12-month ECLs:
- debt securities that are determined to have low credit risk at the reporting date; and

- other debt securities and bank balances for which credit risk (i.e. the risk of default occurring over the expected life of the financial instrument) has not increased significantly since initial recognition.

Loss allowances for trade receivables and contract assets are always measured at an amount equal to lifetime ECLs.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Company's historical experience and informed credit assessment and including forward-looking information.

Measurement of ECLs
ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Company expects to receive). ECLs are discounted at the effective interest rate of the financial asset.

43.16 Impairment (continued)

ii) Non-financial assets

The carrying amounts of the Company's non-financial assets (other than inventories and deferred tax assets) are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated in order to determine the extent of impairment loss (if any). Where it is not possible to determine the recoverable amount of an individual asset, the Company estimates the recoverable amount of the Cash Generating Unit (CGU) to which the asset belongs. An impairment loss is recognised if the carrying amount of an asset or its CGU exceeds its recoverable amount.

The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs to sell. Value in use is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU.

Impairment losses are recognised in profit or loss. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation, if no impairment loss had been recognised.

43.17 Contingencies

i) Contingent liability

A contingent liability is a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company; or a present obligation that arises from past events but is not recognised because it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation; or the amount of the obligation cannot be measured with sufficient reliability.

Contingent liabilities are not recognised in the statement of financial position of the Company. Moreover, contingencies arising from claims, litigations, assessments, fines, penalties, etc. are recorded when it is probable that a liability has been incurred and the amount can be reasonably estimated.

ii) Contingent asset

Contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity.
The Company does not recognise contingent asset.

43.18 Assets held for sale

Non-current assets, or disposal groups comprising assets and liabilities, are classified as held for sale if it is highly probable that they will be recovered primarily through sale rather than through continuing use.

Such assets, or disposal groups, are generally measured at the lower of their carrying amount and fair value less costs to sell. Any impairment loss on a disposal group is allocated first to goodwill, and then to the remaining assets and liabilities on a pro rata basis, except that no loss is allocated to inventories, financial assets, deferred tax assets, employee benefit assets, investment property or biological assets, which continue to be measured in accordance with the Company's other accounting policies. Impairment losses on initial classification as held for sale or held for distribution and subsequent gains and losses on remeasurement are recognised in profit or loss.

Once classified as held for sale, intangible assets and property, plant and equipment are no longer amortised or depreciated, and any equity-accounted investee is no longer equity accounted.

43. Significant accounting policies (continued)

43.19 Earnings per share

The Company presents basic earnings per share (EPS) data for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the year.

Diluted earnings per share is determined by adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding, for the effects of all dilutive potential ordinary shares. However, dilution of EPS is not applicable for these financial statements as there was no dilutive potential ordinary shares during the relevant periods.

43.20 Events after the reporting period

Events after statement of financial position date that provide additional information about the Company's position at the statement of financial position date are reflected in the financial statements. Events after statement of financial position date that are non-adjusting events are disclosed in the notes when material.

44. Going concern

The financial statements of the Company are prepared on a going concern basis. As per management assessment there are no material uncertainties related to events or conditions which may cast significant doubt upon Company's ability to continue as a going concern. The management do not see any issue with respect to going concern due to recent pandemic COVID-19. Besides, the management is not aware of any other material uncertainties that may cast significant doubt upon the Company's ability to continue as a going concern, which is most unlikely though yet considering overall perspectives
