

## Quarterly Update: Q4 FY24

*This update seeks to provide an overall summary of the operating performance and demand trends witnessed during the quarter ended 31<sup>st</sup> March, 2024. A detailed Information Update will follow this once the Board approves the financial results for Q4 FY24.*

During the quarter, FMCG demand sentiment stayed consistent vis-à-vis the preceding quarters with trends in urban and rural consumption largely converging.

In Q4, **the domestic business posted a slight uptick in volume growth** on a sequential basis owing to steadying trends in some of the core portfolios. **Parachute Coconut Oil registered low single-digit volume growth** as we witnessed a continuing revival in loose to branded conversions amidst firming up of copra prices, which was along expected lines. **Saffola Oils delivered mid-single-digit volume growth** as trade-led headwinds subsided with input and consumer pricing exhibiting stability. **Value Added Hair Oils** had an optically weak quarter on a high base coupled with persistent sluggishness in the bottom of the pyramid segment. **Foods** continued its steady run to close the year at **~4x of its scale in FY20** and **Digital-first brands** also sustained its strong growth trajectory, thereby meeting our stated portfolio diversification objective for the year.

Amidst the backdrop of improving macro-indicators, **we expect a gradual uptick in the growth of our core categories** through the ongoing initiatives to enhance the profitability of our General Trade (GT) channel partners and focused investments towards a transformative expansion in our direct reach footprint across urban and rural outlets over the next couple of years. We will continue our focus on driving differential growth in our urban-centric and premium portfolios through the organised retail and E-Commerce channels. We will **continue to aggressively diversify the portfolio through the accelerated scale up of Foods and Digital-first brands** and improve profitability parameters in line with our medium-term strategic priorities.

The **International business reverted to clocking double-digit constant currency growth**, led by Bangladesh bouncing back from transient headwinds and rest of the markets maintaining their positive momentum.

**Consolidated revenue grew in low single digits**, moving back into positive territory after 3 quarters, due to incremental anniversary of pricing cuts in key domestic portfolios. **We expect consolidated revenue growth to trend upwards, with domestic revenue growth outpacing volume growth in the quarters ahead.**

Among key inputs, copra prices inched up in line with forecasts, while edible oil and crude oil derivatives remained stable. In this context, we expect **strong gross margin expansion on a year-on-year basis**. We also **maintained investments behind brand building** in line with our strategic intent to continually strengthen the long-term equity of both the core and new franchises. Consequently, we expect **low double-digit operating profit growth** on the back of a healthy expansion in operating margin, thereby staying on track to deliver on the margin guidance for the full year.

The Company maintains its aspiration of delivering sustainable and profitable volume-led growth over the medium term, enabled by the strengthening brand equity of its core franchises and scale up of new engines of growth.
